

DRAGON

GSM MINI ALARM

SIMPLE ALARM WHICH MONITORS YOUR OFFICE, FLAT OR WEEKEND HOUSE WHILE YOU ARE AWAY! AND IT CAN DO MUCH MORE!

DRAGON informs you about the unauthorized entry of intruder into the monitored room by text message and voice call directly on your mobile phone. It allows you to listen to what is going on in the room after the alarm has been activated or when in stand-by mode. You can use it also in case of danger or health problems (PANIC function) – after a simple pressing of the button, DRAGON informs your family or friends immediately about your emergency situation by text message and voice call.

Small dimensions and low profile design of Mini Alarm allow you to use it also as an interior complement. DRAGON is powered by a power adapter, but in case of need it can work just with an integrated battery (5 days in standby mode). You can use it also on holidays, business trips or weekend house... simply anywhere where you want to be informed immediately about the unauthorized access to your protected room.

DRAGON is a device that can be managed by almost everyone – from a little child to elder person. No keys or difficult passwords are required, the alarm is managed simply by pressing a button or by text messages. Just to put it on the right place, activate and leave...

Applications:

- monitoring of protected premises (flat, office, garage, weekend house...) by integrated motion detector
- reporting of intrusion into the protected premises by text message and voice call
- possibility of remote audio monitoring after the alarm activation or when in stand-by mode
- PANIC function – immediate calling for help in case of danger or health problems
